SUMMARY

Computer Science undergraduate with strong foundations in **Data Structures, Machine Learning, and App Development**. Experienced in building **scalable applications** using Flutter and backend technologies. Passionate about **AI, analytics, and problem-solving**, with a focus on real-world impactful solutions.

EDUCATION

Indian Institute of Information Technology Dharwad Hubli-Dharwad, Karnataka
B.Tech in Computer Science and Engineering | 9.68 CGPA *August 2024 – July 2028*

EXPERIENCE

IDRP (IIIT Dharwad Research Park) Dharwad, India
App Developer Intern Jun ‘25 to Sep ‘25
Tech Stack: Dart, Flutter, Mongo DB

- Developed a mobile application for relapse prevention among patients with alcohol use disorder in the Indian scenario
- Worked using Dart, Flutter, and MongoDB
- Focused on integrating psycho-social intervention features into the application

PROJECTS

Multilingual Polarization Detection Framework [↗ Multilingual-Polarisation-Detection](#)
Tech Stack - XLM-RoBERTa, MiniLM, Scikit-learn, HuggingFace

- Developed a multilingual framework for online polarization detection using transformer embeddings (**XLM-RoBERTa, MiniLM**)
- Built a multi-label classification pipeline using **One-vs-Rest Logistic Regression** with threshold calibration and normalization
- Serialized trained models for deployment-ready inference

Automated Timetable Generator [↗ Automated-Timetable-Generator](#)
Tech Stack: Python, Flask, HTML, CSS, JavaScript

- Developed a **CSV-driven** academic timetable generation system
- Implemented course scheduling and classroom allocation with fallback logic to prevent conflicts
- Built a **Flask-based** web interface for timetable visualization
- Used JSON rendering for structured data handling and enabled **Excel export** functionality

Agentic Virtual Classroom [↗ Agentic-Virtual-Classroom](#)
Tech Stack: React.js, Node.js, Python, MongoDB, FAISS, HuggingFace, Groq LLMs

- Developed an AI-powered virtual classroom platform using a **microservices architecture**
- Implemented **RAG-based** course assistance using **FAISS and HuggingFace embeddings**
- Built conversational memory, adaptive learning features, and MongoDB-backed authentication

Exam Seating Arrangement System [↗ Seating-Arrangement](#)
Tech Stack: React.js, FastAPI, Python, Tailwind CSS, Excel Automation

- Developed a full-stack exam seating allocation system using **React, FastAPI, and Python**
- Implemented constraint-based seat allocation with balanced and strict modes
- Built CSV preprocessing pipelines and generated automated Excel seating plans with room layouts

SKILLS

Programming Languages: C++, C, Python, Dart
Web Development: HTML, CSS, JavaScript, Flask
App Development: Flutter, Dart
ML Tools & Techniques: HuggingFace, XLM-RoBERTa, MiniLM
Databases: MySQL, MongoDB
